OUR PRICES

Terms: Net cash, no discounts. Special prices for orders for over 25,000.

Five hundred trees of any one kind and size at the thousand rate. For less than five hundred of one kind ask for retail price list.

No extra charge for boxes or packing. All orders shipped express unless otherwise specified.

Trees may be planted on light soil in the fall between September 1 and November 1 with perfect safety. Do not attempt fall planting on extremely wet or clay soil. The action of the frost during the winter and spring will throw the trees out of the ground. It is now time to plant and we are ready to make immediate shipment of all varieties offered.

We cannot emphasize too strongly the superior quality of 2-2 stock (two years in seed bed and two years in transplant bed). During the past five years we have had various experiences in planting 3-0 (three-year seedlings) 4-1 (four-year seedlings) 3-1 (three years in seed bed and one year in transplant bed) 3-2 and 2-3 trees. We have proven beyond a doubt in our own minds that the most practical and most economical tree to plant is the 2-2 transplant. This is the only size we will use and guarantee in our contract planting work.
